

Geared Conductive Plastic Potentiometers

ML6-ML100 Series

Special features

- very small dimensions
- 6 - 100 revolutions
- up to 15×10^6 movements
- excellent linearity
- high resolution – better than 0.1%

With a 13 mm profile, the ML6-ML100 Series geared potentiometer combines accurate angle signals, $> 360^\circ$, with excellent linearity in an extremely small package.

Careful selection of materials and high-quality components ensure a constant measurement throughout the entire service life of the sensor.

Special designs with other linearities and shaft dimensions are available on request.

Important

All values given for this series – including linearity, lifetime, micro-linearity, resistance to external disturbances and temperature coefficient in voltage dividing mode – are quoted for the device operating with the wiper voltage driving an operational amplifier working as a voltage follower where virtually no load is applied to the wiper ($I_e \leq 1 \mu A$).
